Date: _____

ETHANOL IN A BAG

Explain in full sentences what you predict will happen when we mix yeast, a feed source and warm water together.

Which feed source (corn starch, corn meal, sugar or corn oil) do you predict will have the most reaction when mixed with yeast and warm water?

Which feed source did you have? What happened to your experiment after 15 minutes?

Discuss as a class, which feed source had the most reaction? What was produced?
