

# **Watershed Intro Activity!**

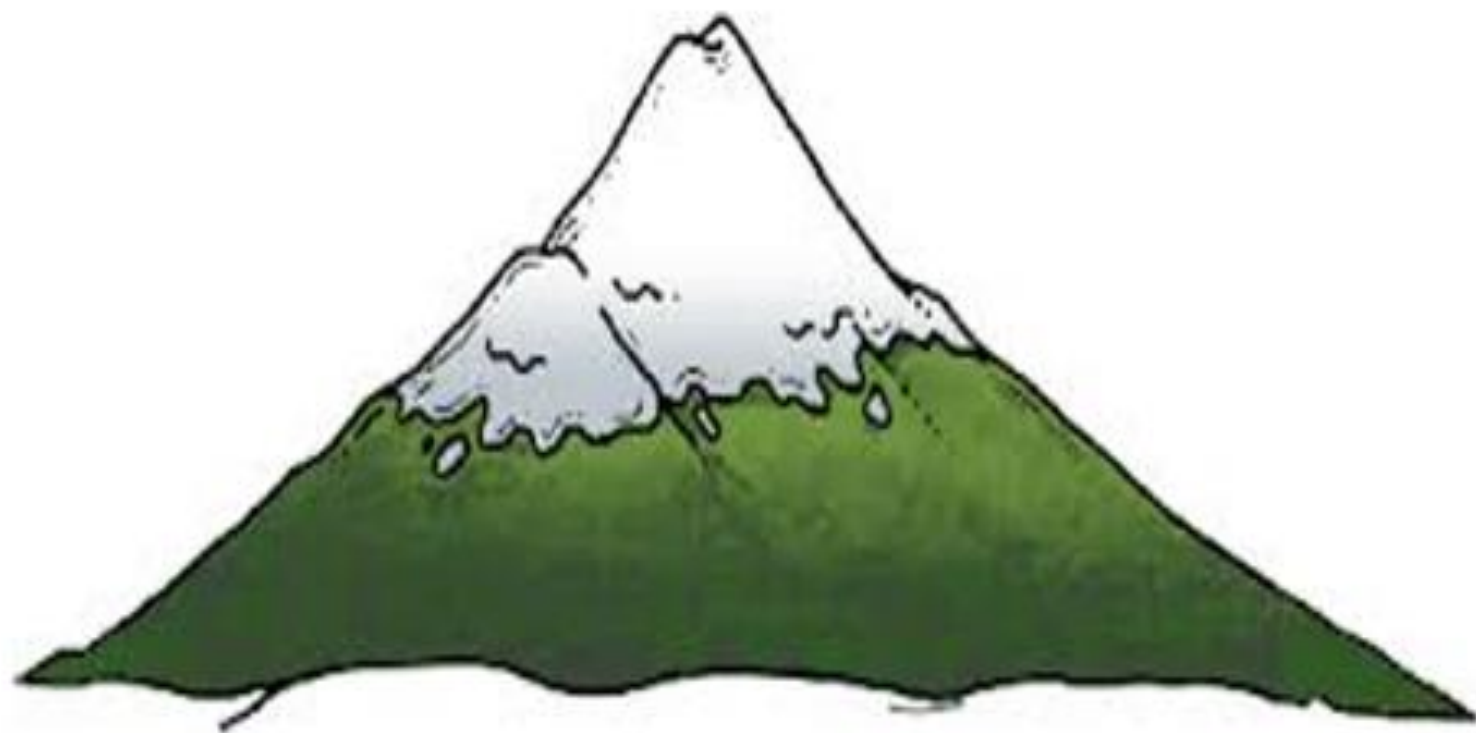

3.Creek

5.Lake

1. Start in your cloud

2.Snowpack

4. Waterfall

## 6. River

## 6. Groundwater

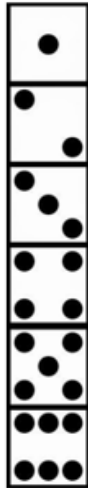

# 7.Ocean

You will now be evaporated from the ocean, become condensation in the air, and become precipitation (rain) again in the cloud.

### Watershed Adventure

You are a drop of precipitation (rain). Where will you end up and what will you collect along the way?

You **evaporated** and have become **condensation**! Go back to the beginning of the **water cycle** and wait until your next turn (rain).

Flow to the next step in the **watershed** and tell your group where you are.

You flowed through some farmland and picked up some **chemical fertilizer** and animal waste. Now you're **polluted**! Go directly to the water purification plant to get clean.

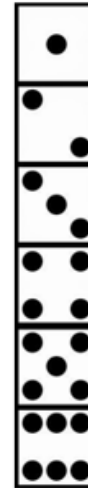

You **absorbed** into the ground and have become **groundwater**. Move to **groundwater**.

Flow to the next step in the **watershed** and tell your group where you are.

You flowed through a neighborhood and picked up some **trash** and **sediment**. Now you're **polluted**! Go directly to the water purification plant to get clean.
